

Yaacoub's Contribution Statement

I worked on the overall structure of the report itself, completed Task 1, chose the dataset and set up the group project registration, set up the github and the word document, fixed up the readme, and tried to cut down the word count as much as I could (Task 4 takes up a lot of words) and obviously wrote my individual work down on the word document, the same (roughly) interpretation is on the jupyter file, the jupyter file has a bit more information since we couldn't go into full detail on the docx.
